## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The combiner as recited in the claims lacks description in the specification and it is not shown in the drawings.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "where said low band speech coder" in line 1. There is insufficient antecedent basis for this limitation in the claim.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2655

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10, 16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ogata et al. (5,926,791).

As to claim 1, Ogata teaches a sub-band encoder (Fig.4) comprising,

Means for splitting an input signal [Xi] into a high frequency-band signal (Xho) and low frequency-band (Xlo) signal;

Down sampler (14L, 14H), for further down sampling the low frequency-band (XIo) signal;

A low band encoder (16a, 16b), a high band encoder (16c); and

A "combiner" (17) for combining the encoded signal.

As to claims 10, 16 and 18, Ogata teaches the decoder (Fig.5) for reversing the process performed by the encoder including up-sampling (23L, 23H) the low-band signal, filtering (24, 28) and summing (29) the signals.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2, 4-9, 11-15, 17, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogata.

Art Unit: 2655

With respect to claims 2, 4-9, 11-15, 17, 19 and 20, claiming a band-pass filter and the various types of coders, as well as random noise generator and excitation vector code book or multi-pulse waveform, Official Notice is taken that these systems/apparatuses are common and well known in the art of speech/image signal coding and would be obvious in Ogata's art for the purpose of encoding the signals.

## Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D Abebe whose telephone number is 703-308-5543. The examiner can normally be reached on monday-friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on 703-305-4827. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
